

BOXER SL

Compact Slalom Performance

The Naish Boxer SL applies the Boxer paradigm to slalom sailing. The result is a sail with incredible low-end power that planes early, has excellent top speed, and is extremely easy to handle due to its short luff and boom lengths. For 2010, the sail is 15% lighter and features a new composite sleeve, making it even more responsive in lighter winds. The 5.8, 6.4 and 7.0 rig on RDMS, and are a turn key single sail solution for wave sailors who want to get back into slalom as well as anyone looking for a lightweight, early planing powerhouse. The new 7.6 and 8.2 deliver the same outstanding performance characteristics, but optimized for heavyweights and larger boards.

CONSTRUCTION: Ultralight slalom
PURPOSE: Light to medium wind slalom
CHARACTERISTICS: Early planing, solid power, easy handling
GEOMETRY: Single luff panel, medium sleeve, 6 battens, 3 tubes, 2 cams

SIZES: 5.8, 6.4, 7.0, 7.6, 8.2
