

# FREEWIDE

## Light Wind / Flat Water Champion

The Freewide combines an easygoing, stable ride with effortless planing, making it the ideal light wind machine for riders of all levels. This early planing shape features decreased rail volume to let the board glide smoothly through the lulls. Tail wingers and cut outs provide maximum control even in windy conditions. The reduced tail area behind the footstraps combined with a slight tail kick rockerline makes the Freewide jibe with little effort like a much smaller board. For light wind areas, the early planing Naish Freewide is often the difference between a great day on the water and wishing you stayed home.

- \* SANDWICH WOOD DECK & BOTTOM
- \* COMPOSITE FIN
