

# RIPPER & MINI RIPPER

*Serious Sails for Kids*

## **RIPPER** SIZES: 2.7, 3.2, 3.7, 4.2

The all new Ripper incorporates the compact outline and unique geometry of the Boxer into a range optimized for kids. Featuring a single dacron luff panel, and moderate luff curve tuned for small, lightweight riders, the Ripper is easier than ever thanks to the short luff and boom that keeps swing weight at a bare minimum. For 2010, the new construction makes the sail even lighter without compromising durability. The premium ride for kids regardless of whether they are beginners or pros.

## **MINI RIPPER** SIZES: 0.8, 1.4, 2.0

Drawing on the same construction technology, but with one less batten and optimized for an extendable alloy mast that fits all three sizes.

**CONSTRUCTION:** Light surf

**PURPOSE:** Real performance sails to help kids progress to the next level

**CHARACTERISTICS:** Responsive, easy handling and light

**GEOMETRY:** Single dacron luff panel, compact outline, Ripper - 4 Battens, Mini Ripper - 3 battens

## **RIPPER**
