

SP LTD

Pro Level Slalom Performance for All Riders

Based on the philosophy that only a board that is easy to control can ultimately go fast, the Naish SP Ltd. delivers blistering speed yet rides nearly effortlessly, even in rough water. Shaped by renowned slalom expert Richard Greene, the designs combine a top speed oriented rockerline, tail cut-outs that facilitate top speed due to the decreased surface area, and a shape flow that results in unbelievably easy jibing. The ultra lightweight Technora sandwich construction adds responsiveness and lightning quick acceleration, making these boards the only serious choice for both serious racers and weekend warriors who want the best slalom board on the market.

- SANDWICH TECHNORA DECK & BOTTOM
- TUTTLE BOX
- G10 CNC FINs
- INCLUDES ECO BOARDBAG
- ISAF REGISTERED
