

SPRINT

No-Cam Freeride Powerhouse

The original no-cam freeride/slalom sail is still the best. With an outline refined over years of development, a single scrim luff panel that makes it responsive and powerful in light winds, and a new internal shaping technology that has extended the wind range at the top end, the Sprint delivers a winning combination of performance, easy handling and durability. The optimum choice for free ride sailors of all sizes and skill levels.

CONSTRUCTION: Classic
PURPOSE: Effortless freeride/slalom
